HEAVY DUTY MUFFLERS

MODERATE
EXTERIOR SOUND LEVEL

MODERATE
INTERIOR RESONANCE

The 50 Series Heavy Duty Muffler is appropriately named, a tough customer just like the trucks it was designed for. With 4.00-inch internal components and large case size, these mufflers help to significantly increase mileage, torque, and horsepower while greatly improving towing power and acceleration. The 50 Series Heavy Duty is great for all gas and diesel applications, and late-model trucks used in the most extreme working conditions. They are constructed of 16-gauge steel and fully MIG-welded for maximum durability. Stainless models carry a limited lifetime warranty.

- Great for quieting large displacement engines
- Works great with both gasoline and diesel applications
- Large case features three-chamber internal design
- Terrific power/torque improvement for tow vehicles
- Specifically designed for Dodge trucks with Hemi engines

POWER TO PULL >>

Torque is the key to towing power. It's what gets you going when that extra power to pull is required. Flowmaster's three chamber design works well with either diesel or gasoline engines to help scavenge/evacuate the engine's internal combustion chamber so it can take a better, bigger breath of fresh fuel and air, increasing the combustion efficiency of the engine and increasing engine torque.
