PERFORMANCE MUFFLERS

MODERATE
EXTERIOR SOUND LEVEL

MODERATE
INTERIOR RESONANCE

Our HP-2 Performance Muffler is a real hot rod's muffler that delivers all the required benefits of a high performance street and race muffler, yet is small enough for street rod applications. Built from either 409S or 304 stainless steel, this smooth, stylish muffler can be polished or coated for a great looking show-ready finish. The HP-2 muffler is designed for use with street rods, customs, lowriders and sport trucks or industrial applications where heat control and space are an issue. The HP-2 mufflers feature an innovative "Cool Shell" casing, a key feature in contributing to the muffler's sound and heat control design. Advanced "flow" technology produces broadband sound cancellation for a rich '50's tone.

- Delivers terrific '50's style street rod tone
- Laminar Flow muffler technology
- 304 or 409S Stainless Steel exterior casing
- Limited lifetime warranty to original purchaser
- Low exterior heat via Cool Shell Technology
- Overall reduced exterior sizing for easy fitment

409S® Stainless Steel
